

52 years of proven reliability.
Now modernized.

RENVIZON PUBLIC SAFETY SUITE
AI-Enabled. Cloud-Ready. Reliable.

Renvizon Ticketworks

Integrated Citation Management for Safe, Reliable Enforcement

Renvizon TicketWorks is a cloud-ready citation management platform that automates the capture, validation, and submission of enforcement data. Built for accuracy and officer safety, it streamlines ticketing, eliminates errors, and connects enforcement activity directly with agency records and court systems for faster, more reliable outcomes.

Integrated Capabilities

-  **Mobile Device Deployment**
Operate on secure handhelds and tablets with offline resilience.
-  **License Scanning**
Instant barcode and ID capture reduces manual entry and eliminates duplication.
-  **Digital Evidence Capture**
Attach GPS, timestamps, photos, and signatures directly to the citation record.
-  **Electronic Summons & Special Complaints**
Supports issuance of electronic summons (eSummons/ Special Complaints) for State, Local & Municipal violations/ codes and submit to AOC automatically.

System Integration

DMV, NCIC, NLETS Real-time data access and validation	Body Camera Compatibility Future-ready linkage with video capture	Court & Records Platforms Built-in support for eSummons and Special Complaints	Secure Data Handling CJIS-compliant and encrypted communications

Renvizon Public Safety Suite

Built to empower responders and strengthen communities.

Renvizon TicketWorks connects seamlessly with Renvizon CAD, RMS, and Advizor, forming the Renvizon Public Safety Suite – a connected platform unifying dispatch, records, enforcement, and analytics into one ecosystem. Built on a cloud-ready, AI-enabled architecture, it bridges data and operations, delivering speed, accuracy, and reliability when it matters most.

Key Advantages

-  **Real-Time Ticketing**
Issue and transmit citations instantly to records and court systems.
-  **Connected Enforcement**
Sync directly with DMV, NCIC, NLETS, and other mission-critical databases for instant lookups and validation.
-  **Cross-Platform Operation**
Work securely from handheld, tablet, or in-car devices.
-  **Built-In Accuracy**
Barcode scanning, GPS tagging, and automated validation ensure clean, complete, court-ready records.
-  **Faster, Safer Stops**
Guided workflows reduce roadside time, improve accuracy, and protect officers and the public.
