

52 years of proven reliability.
Now modernized.

RENVIZON PUBLIC SAFETY SUITE
AI-Enabled. Cloud-Ready. Reliable.

Renvizon Crash

Crash Reporting for Faster, Cleaner Records

Renvizon Crash is a cloud-ready crash reporting platform that guides officers from scene to state submission. Built-in, state-specific validation checks and the integrated ESD diagramming tool help reduce errors and speed up report completion.

Integrated Capabilities

Screen Search

Search hundreds of fields, including narrative, location, accident type, and vehicles involved.

Guided Report Wizard

Step-by-step form covering Basic Information, Location & Diagram, with dynamic, state-specific validations built in.

ESD Diagramming Tool

Draw vehicles, signs, and scene layouts for clear, court-ready visuals.

State Submission

Completed reports submit directly to state systems.

Key Advantages

Smart Validation

Flags missing or incorrect fields in real time and redirects you straight to the fix.

Configurable Two-Level Approval

Set one or two reviewer workflows to match state requirements.

Dual PDF Output

Generate redacted public & full police PDFs at any point, complete or in progress, so you can check as you go.

Linked Records

See related incidents and evidence tied to each crash.

CAD Integration

Reports auto-assign to officers via CAD Dispositions.

Renvizon Public Safety Suite

Built to empower responders and strengthen communities.

Renvizon Crash connects seamlessly with Renvizon CAD, RMS, and TicketWorks, forming the Renvizon Public Safety Suite, a connected platform unifying dispatch, records, enforcement, and analytics into one ecosystem. Built on a cloud-ready, AI-enabled architecture, it bridges data and operations, delivering speed, accuracy, and reliability when it matters most.
