

52 years of proven reliability.
Now modernized.

RENVIZON AI SUITE

Secure. Accurate. Built for Public Safety.

Renvizon Lenz

Crime Intelligence at the Speed of a Question.

Renvizon Lenz is an AI-powered crime analytics tool that transforms plain-English questions into instant investigative intelligence. By querying directly against your live CAD, RMS, and case data in real time, Lenz replaces hours of manual report-building with a single natural language search. Purpose-built for investigators, detectives, crime analysts, and command staff who need answers — not dashboards.

Integrated Capabilities

Natural Language Case Search

Search thousands of incidents using plain English. No SQL knowledge, no report builder, no specialist required.

Multi-Engine Intelligence

Semantic search, keyword matching, and real-time SQL run simultaneously to return the most complete and accurate results from your data.

Case Binder

Bookmark key incidents, organize them into an investigative binder, and chat directly with individual case narratives — no matter how long they are.

Instant Analytics and Reports

Generate charts, summaries, and downloadable reports from any search result in seconds — ready to copy into any reporting system.

Key Advantages

Replaces Hours of Manual Work
What takes a specialist 30 to 40 minutes today takes seconds with a plain-English question.

100% Accuracy
Target Lenz queries your live database directly. Results are built on real data, not approximations or summaries.

Chat With Any Case
Open any incident and ask questions about that specific narrative.

Connects to Any Data Source
Works natively with RMS or any other records system. All Lenz needs is secure read access to your database.

Real-Time Data
Lenz pulls from live operational database, so results always reflect what is actually in the system.

Exportable Intelligence
Copy, share, or download results and summaries directly into reports, court documents, or command briefings.

Renvizon AI Suite

Intelligence Layer for the Modern Department.

Renvizon Lenz is part of the Renvizon AI Suite — a growing set of AI-powered intelligence tools built for public safety. Together with Renvizon Vizon, Lenz gives investigators and analysts direct access to the answers inside their data, without rebuilding workflows from scratch.
