

52 years of proven reliability.
Now modernized.

RENVIZON PUBLIC SAFETY SUITE
AI-Enabled. Cloud-Ready. Reliable.

Renvizon RMS

Intelligent Records for Accurate, Informed Decisions

Renvizon RMS is an AI-enabled, cloud-ready records management platform that transforms incident and investigative data into actionable intelligence. Built for accuracy and efficiency, it streamlines reporting, connects cases, and delivers insight that powers precision policing.

Integrated Capabilities

Agency Documents

Manage permits, licenses, and internal records in a secure central repository.

Crash Reporting

Capture, diagram, and document crash scenes with integrated evidence tracking.

Personnel Management

Track training, certifications, and scheduling from a single dashboard.

State & Federal Reporting

Automated processes to ensure data accuracy and compliance.

Key Advantages

Intelligent Crime Insights

Identify patterns, repeat offenders, and hotspots through AI-driven analysis that supports proactive operations.

Automated Workflows

Eliminate manual entry and speed reporting with guided, policy-aware processes – reducing administrative time and returning officers to the field.

Validated, Compliant Data

Automated checks ensure every record meets agency, state, and federal compliance standards.

Centralized Investigations

Connect incidents, evidence, and subjects through unified search and relational data models.

Configurable Setup

Tailor screens, forms, and reports without custom code – built to adapt as agency needs evolve.

Renvizon Public Safety Suite

Built to empower responders and strengthen communities.

Renvizon RMS connects seamlessly with Renvizon CAD, and TicketWorks, forming the Renvizon Public Safety Suite – a connected platform unifying dispatch, records, enforcement, and analytics into one ecosystem. Built on a cloud-ready, AI-enabled architecture, it bridges data and operations, delivering speed, accuracy, and reliability when it matters most.
