

52 years of proven reliability.
Now modernized.

RENVIZON AI SUITE

Secure. Accurate. Built for Public Safety.

Renvizon Vizon

Instant Answers from Every Policy, Law, and Procedure.

Renvizon Vizon is an AI-powered knowledge assistant built exclusively for law enforcement. Officers and staff can ask plain-English questions and instantly receive accurate, source-cited answers drawn from department policies, general orders, state statutes, and local ordinances. Vizon stays strictly within your department's document library and never accesses the open internet — keeping sensitive operations private and secure.

Integrated Capabilities

Policy and Law Search

Ask any procedural or legal question and receive a cited, plain-English summary in seconds — no manual digging required.

Source-Cited Responses

Every answer shows exactly which policy, statute, or general order it came from, so officers can verify and act with confidence.

Secure, Closed AI

Vizon operates entirely within your department's document environment. It does not connect to the internet or external AI platforms.

Voice and Multilingual Input

Ask questions by voice or in any language. Vizon processes the input and delivers accurate responses in English.

Key Advantages

No Hallucination

Constrained prompts and a strict orchestration layer ensures responses based on your documents.

Always Cites Sources

Officers see exactly where every answer came from: the specific policy, order, or statute every single time

Zero Training Curve

If officers can type or speak a question, they can use Vizon. No technical knowledge required.

Works as a Standalone Product

Vizon does not require Renvizon CAD or RMS. Any department can deploy it with their existing document library.

Private by Design

Your department's policies, procedures, and legal documents never leave your secure environment.

Any Device, Any Time

Accessible from desktop, tablet, or mobile — built to be available when and where officers need it.

Renvizon AI Suite

Intelligence Layer for the Modern Department.

Renvizon Vizon is part of the Renvizon AI Suite — a growing set of AI-powered intelligence tools built for public safety. Together with Renvizon Lenz, Vizon gives departments instant access to both knowledge and data, without replacing the systems they already trust.

RENVIZON
